

RUBIS EVOLUTION

New Snow producers

The best of the high performance
Rubis technology
by Johnson Controls Neige

RUBIS EVO

Specifications

New nucleation:

3 nucleators of latest generation

New performances:

Start-up temperature: -2°C

Pressure 18 bars

Optimized snow quality

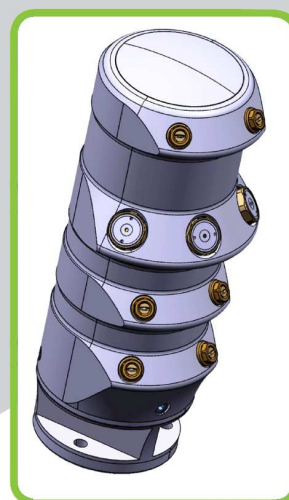

New shape:

Protection against ice build-up

Adapted to all trail profiles

Reduced wind sensitivity

6 / 10 meter high

- -2°C Wet build temperature
- Minimum operating pressure of 18 bars
- Specifications of snow producers are subjected to technological evolution
